

## 2016 Heart - Templates

This document contains all the templates needed to build the 2016 Heart as pictured above. Printed on A4 paper (no scaling) the final size is 22 x 16 x 12 cm (9 x 6 x 5 in).

x-Layer: reinforces the tabs for strength and precision. Only the elements closing the veins and arteries will be visible after completion.

Suggested paper weight: 200 gsm

y-Layer: the visible outside (skin) of the heart.

Suggested paper weight: 150 gsm

Detailed instructions with images for this heart can be found at:

[torso.amorphous-constructions.com/instructions/2016Heart/](http://torso.amorphous-constructions.com/instructions/2016Heart/)

Printing the templates at 100% will produce an oversized heart which is easier to assemble; for a 'life-size' heart scale the templates to about 50%.
