Heart - Interior Subdivisions - Templates

Solid line: cut - broken line: crease
Large labels starting with an 'a' (00 to 07) denote strips of triangles from the inner layer of the aorta.
Large labels starting with a 'p' (00 to 06) are part of the interior layer of the pulmonary artery.
Large labels starting with 'la' (00 to 18) are part of the interior layer of the left atrium.
Large labels starting with 'ra' (00 to 12) are part of the interior layer of the right atrium.
Large labels starting with 'lv' (00 to 07) are part of the interior layer of the left ventricle.
Large labels starting with 'rv' (00 to 11) are part of the interior layer of the right ventricle.
Large labels starting with 't' (00 to 34) are part of the outer layer.
The small labels indicate to which strip of another layer the respective triangle connects.
Numbers in a circle indicate the order in which to glue together the triangles (between one and six at a time).
Detailed instructions with images can be found at:
http://torso.amorphous-constructions.com/

Printing out the templates at 100% will produce an oversized heart which is easier to assemble; for a 'life-size' heart scale the templates to about 50%.
